My favorite Breastfeeding Products:

Slim Lines Frozen Milk Trays are indispensable for any nursing mother, especially those who pump breast milk daily and bottlefeed! I've been lucky enough to try out these milk trays and can't rave about them enough. The genius behind Slim Lines Frozen Milk Trays is the shape. Each tray holds 8 ounces in the form of 8 one ounce individual Milk Sticks™. Rather than using ice cube trays or nurser bags, the Slim Lines trays allow you to maximize your milk--so much is lost in those nurser bags--and maximize the convenience of fitting the Slim Line Milk Sticks™ through the bottle opening and defrosting the milk from there. Saving extra steps and saving milk in the end! Simply grab exactly how many ounces you need and pop them in the bottle. Excellent for the convenience of working moms and their childcare providers. I also like the convenience of grabbing just one ounce out of the freezer to mix in with Emme's cereal. Designed especially for breast milk storage, you'll find that the REAL MOMS who invented Milk Sticks™ thought of every detail in the development of this ingenious product!
